PROFESSIONAL SUMMARY

DevOps-focused full-stack engineer skilled in automated multi-server deployments, CI/CD pull-and-deploy pipelines, and containerized microservices with Docker, Docker Compose, and Docker Swarm. Backs Linux VPS / GCP administration, Nginx load balancing, and PM2/systemd orchestration with production full-stack delivery across Node.js, Express, GraphQL, and Next.js.

TECHNICAL SKILLS

DevOps & Infrastructure: Docker, Docker Compose, Docker Swarm, Nginx (Reverse Proxy & Load Balancing), PM2, systemd, Linux, Bash, VPS Administration

CI/CD & Cloud: CI/CD Pipelines, Pull-and-Deploy Automation, Multi-Stage Docker Builds, GCP, Contabo VPS, Vercel, Render, MongoDB Atlas

Backend: Node.js, Express.js, GraphQL, REST APIs, Microservices, JWT Auth & RBAC, Socket.IO, Craft CMS

Frontend: React.js, Next.js (App Router), JavaScript, TypeScript, Tailwind CSS, shadcn/ui, Framer Motion

Databases & Version Control: MongoDB, Mongoose, PostgreSQL · Git, GitHub, GitLab, Branch & PR Workflows

EXPERIENCE

DevOps & Full-Stack Developer Intern — VrixaaLabs

Jun 2025 – May 2026

- Built CI/CD pull-and-deploy pipelines across 5 production Contabo VPS instances, enabling zero-touch deployments on every push.
- Containerized and orchestrated services with Docker, Docker Compose, and Docker Swarm; configured Nginx reverse proxy/load balancing and PM2/systemd for zero-downtime restarts.
- Led full-stack development of a scalable social-media platform with GraphQL APIs (Node.js/Express) and React.js/Next.js frontends.

Software Developer Intern — Aortem.io

Oct 2025 – Feb 2026

- Built automated CI/CD pipelines on GitLab to streamline releases for a QA testing platform, deployed on Google Cloud Platform (GCP).
- Engineered the full frontend/backend architecture, integrating Dart SDKs and an in-app code editor for real-time test execution.
- Developed content-managed features with Craft CMS and secure third-party integrations (GitHub, GitLab) for repository syncing.

PROJECTS

MedClarity — AI Medical Document Explainer

pyro-six.vercel.app

Tech: Next.js, React, TypeScript, Tailwind CSS, Google Gemini Vision, ElevenLabs, Edge TTS, Telegram Bot API, Nodemailer, Vercel

- Built and deployed an AI healthcare app on Vercel that uses Google Gemini Vision to explain medical documents in 10 Indian languages with voice playback (Edge TTS/ElevenLabs); also shipped a Telegram bot client sourcing data from the same Next.js backend.
- Built a prescription parser that converts dosages and timings into structured JSON and downloadable/email .ics calendar reminders via Nodemailer/SMTP.

AdAlign — AI Landing Page Personalization Dashboard

ad-align.vercel.app

Tech: Next.js, React, TypeScript, Tailwind CSS, OpenRouter API, Gemini / Vision Models, REST API Routes

- Built and deployed a full-stack Next.js AI app (Vercel, CI/CD) that analyzes ad creatives and generates personalized, brand-aligned landing pages via a multi-step Next.js API pipeline.
- Hardened reliability with API-key validation, model fallback, rate-limit/auth detection, retry logic, and HTML validation; used OpenRouter for multimodal data extraction.

Elevana — Full-Stack E-Learning Platform (Microservices)

elevana-rosy.vercel.app

Tech: Next.js 15, TypeScript, Tailwind v4, shadcn/ui, Node/Express, Mongoose, MongoDB Atlas, Socket.IO, JWT, Docker, Vercel, Render

- Architected a 4-service microservices system (auth, catalog, learning, chat) over MongoDB Atlas, containerized with multi-stage Docker builds and deployed across Vercel/Render/Atlas with health checks and env-driven config.
- Implemented cross-service JWT auth with RBAC and server-side quiz grading, plus real-time Socket.IO chat (presence, gated channels) and a teacher studio with MongoDB aggregation analytics.

EDUCATION

B.Tech in Computer Science and Engineering — Tezpur University

2024 – 2028

GPA: 7.5 / 10
