PROFESSIONAL SUMMARY

DevOps-focused full-stack developer skilled in automating multi-server deployments, building CI/CD pull-and-deploy pipelines, and containerizing applications with Docker, Docker Compose, and Docker Swarm. Experienced administering Linux VPS fleets and Google Cloud Platform environments, configuring Nginx reverse proxies, and managing process orchestration with PM2 and systemd. Backs strong infrastructure work with hands-on backend (Node.js, Express, GraphQL) and frontend (React, Next.js) engineering, with a focus on reliable, scalable, and fully automated systems.

TECHNICAL SKILLS

DevOps & Infrastructure: Docker, Docker Compose, Docker Swarm, CI/CD Pipelines, Nginx (Reverse Proxy & Load Balancing), PM2, systemd, VPS Administration, Linux, Bash Scripting

Cloud & Deployment: Google Cloud Platform (GCP), Contabo VPS, Automated Pull-and-Deploy Workflows, Containerized Deployments

Version Control: Git, GitHub, Branch & PR Workflows

Backend: Node.js, Express.js, GraphQL, REST APIs

Frontend: React.js, Next.js, JavaScript, GSAP, Framer Motion

Databases: MongoDB, PostgreSQL

Practices: Test-Driven Development, Version Control Workflows, Project Management, Critical Thinking

EXPERIENCE

DevOps & Full-Stack Developer Intern — Vrixaalabs

Jun 2025 – May 2026

- Built and maintained CI/CD pipelines that automated pull-and-deploy workflows across 5 production VPS instances (Contabo), enabling consistent, zero-touch deployments on every code push.
- Containerized and orchestrated services using Docker, Docker Compose, and Docker Swarm, supporting multi-node scaling and reliable rollouts across the cluster.
- Configured Nginx as a reverse proxy to route and load-balance traffic across multiple application instances.
- Managed application processes and zero-downtime restarts using PM2 and systemd across all server environments.
- Spearheaded full-stack development of a scalable social-media platform, building GraphQL APIs with Node.js/Express and dynamic React.js/Next.js frontends.

Software Developer Intern — Aortem.io

Oct 2025 – Feb 2026

- Designed and implemented automated deployment pipelines, streamlining the release process for a QA testing platform.
- Worked with Google Cloud Platform (GCP) to provision and deploy cloud-hosted application services.
- Engineered both the frontend and backend architecture for a sophisticated QA testing application, integrating Dart SDKs for cross-platform performance.
- Built a fully functional in-app code editor for real-time test execution and a seamless developer workflow.
- Implemented secure third-party API integrations, including GitHub, for repository syncing and management.

EDUCATION

B.Tech in Computer Science and Engineering

2024 – 2028

Tezpur University • GPA: 7.5 / 10
